Classified Ads

Advertising policy: Although the Academy believes these classified ads are valuable, the Academy does not investigate the offers made and assumes no responsibility concerning them.

Frequently, it is necessary to modify the wording of classified ads. These changes are generally made in compliance with the regulations of various levels of government, which vary and are subject to change at any time. These changes may be interpreted as being unfair or in conflict with professional standards of medical practice.

Advertising of materials containing specifications as to race, creed, color, age, religion, sex, ethnic origin, or national origin may be unlawful and is not acceptable. Such specifications may also be discriminatory and/or unacceptable in AAP NEWS.

Other professional consideration in various advertising classifications might be considered as being unfair and/or in conflict with professional standards of medical practice. Improper language could include: "Certain qualifications required for sale of the offer of products or "kickbacks," wording that could be interpreted as derogatory or defamatory to other physicians or potential buyers. The sale of products is not acceptable.

These advertising modifications are made to maintain a classified advertising section that is professionally responsible, lawful, scientific and free of discrimination.
