

## SUBMITTING YOUR SUPPLEMENT

To submit the supplement, do so using Manuscript Central (<https://mc.manuscriptcentral.com/pediatrics>). Use proper capitalization - Do not use all CAPS, or all lowercase, or HTML. Click on the "Save and Continue" button on each screen to save your work and advance to the screen.

**Supplement Step One: Type, Title, and Abstract.** Select the Supplement article type and enter a title and short title. Because this is a supplement, put "n/a" for the abstract, table of contents summary, and the what's known/what's added summaries.

**Supplement Step Two: Attributes.** Enter the appropriate keywords/categories for your submission.

**Supplement Step Three: Authors & Institutions.** All authors must be listed here. Before adding a new author, check to see if the author is already in the database (enter the author's e-mail address and click "Find"). It is important that these e-mails be up-to-date, since they will need to use this email/login to access the required online copyright and disclosure forms later in the process. If the author is found, their information will be automatically filled out for you. For an author that is not found, enter the information, then click "Add to My Authors."

Be sure your author listing is correct. Except in instances where the editorial office has determined that a person does not qualify for authorship, Pediatrics does not allow changes to the author order, including adding or removing authors from a paper or any subsequent revisions.

**Supplement Step Four: Reviewers & Editors.** To indicate any non-preferred reviewers, enter the reviewer's information and click the appropriate designation button.

**Supplement Step Five: Details & Comments** (with Cover Letter). Input or attach your cover letter here.

**Supplement Step Six: File Upload.** In this step, you will be prompted to upload your files. Your manuscript text files should be in .RTF or .DOC format. Technical requirements for tables/figures can be found here: <http://www.aappublications.org/content/pediatrics-author-guidelines#figures>

The supplement should begin with several pages of introductory information that should be uploaded as multiple Word files, such as:

- COVER (Title, Sponsored by...);
- TITLE PAGE (Title, Sponsored by..., Date of symposium (if any), Location of symposium, Corresponding Editor(s) of supplement);
- PARTICIPANTS (if applicable; Conference participants names, institutions, cities);
- TABLE OF CONTENTS; and
- INTRODUCTION.

You can download and view a sample Supplement (PDF) here:

[http://www.aappublications.org/sites/default/files/additional\\_assets/aap\\_files/Pediatrics/Pediatrics\\_Sample-Supplement.pdf](http://www.aappublications.org/sites/default/files/additional_assets/aap_files/Pediatrics/Pediatrics_Sample-Supplement.pdf). You may also wish to find a recently published supplement to *Pediatrics* and use it as a guide, or view supplements at <http://pediatrics.aappublications.org/content/supplemental>.

Articles in a research-oriented supplement should follow the Regular Article format ([http://www.aappublications.org/content/pediatrics-author-guidelines#regular\\_article](http://www.aappublications.org/content/pediatrics-author-guidelines#regular_article)), while other types of supplements should follow the Special Article format ([http://www.aappublications.org/content/pediatrics-author-guidelines#special\\_article](http://www.aappublications.org/content/pediatrics-author-guidelines#special_article)). Abstracts should be structured (Regular) or unstructured (Special) as indicated. The general submission instructions (including title page, contributors' statement page, journal style guidance, and conflict of interest statements) also apply to these individual supplement articles.

Upload each individual article as a separate Word file. Unless you have received other instructions from the editorial office, all articles (not including introductory material listed above) must have a complete Title Page as shown in the Title Page guidelines: [http://www.aappublications.org/content/pediatrics-author-guidelines#title\\_page](http://www.aappublications.org/content/pediatrics-author-guidelines#title_page). Be sure that each author's conflict of interest, funding, and financial disclosure (on the title page) is complete and accurate. These must match the copyright and disclosure forms required later in the process. There is no word limit for articles in a supplement, but they should be concise. Include a contributors' statement page (<http://www.aappublications.org/content/pediatrics-author-guidelines#csp>) and unstructured abstract for all articles. Be sure to collate uploaded files submitted (as necessary) to match the order in which they should appear.

**Supplement Step Seven: Review & Submit.** Review your submission (in PDF and HTML formats) before sending it to the editors. Click the "Submit" button when you are done reviewing. You may halt a submission at any step and save it to submit later. After submission, you will receive an email confirmation. You can log-on to [Manuscript Central](#) any time to check the status of your manuscript. The editors will inform you via email once a decision has been made.

Once the supplement is received by the deputy editor, it is sent out in its entirety to reviewers. If the supplement is provisionally accepted, revisions may be required. If revisions cannot be made to the satisfaction of the editors, the supplement may be rejected.

We estimate 120 days from final acceptance to publication. However, this timeline can vary depending on the number of other supplements already scheduled for publication.
