NEW APPLICANTS

Dear Academy Fellow:

In order to fulfill the admission requirements of AAP Bylaws, you are requested to:

1) carefully review the following list of new applicants for Academy membership and relay your reactions directly to your District Chairperson, whose name and address is at the end of this list.

In submitting these names of board-certified pediatricians to you, it is understood that academic and pediatric credentials are not in question. Comments are requested concerning possible legal and/or ethical situations of which you might have personal knowledge. Send any comments on the following list of new applicants to your District Chairperson by May 15.

April 1998 AAP News 37
“I’d thought nothing could wake our six year old son. But when a urologist recommended the Potty Pager, we decided to give it a try. Three weeks later our son’s bedwetting problems were over!”

Jan Van Hoff

BEDWETTING! WHY JUST “CONTROL” IT WHEN YOU CAN CURE IT!

WITH THE WIRELESS ALARM THAN ALERTS THE BEDWETTER... NOT THE WHOLE HOUSE!

THE POTTY PAGER TEACHES BEDWETTERS TO RESPOND NORMALLY TO BLADDER FULLNESS. IT USES A TACTILE ALARM, MUCH LIKE A SILENT BUSINESS PAGER. IT IS 100% SAFE, RUNS ON TWO “AA” BATTERIES, AND COSTS JUST $49.95 + S&H. IT COMES WITH A 30 DAY NO-QUESTIONS GUARANTEE. WE’RE THAT SURE IT’LL WORK!

FOR COMPLETE INFO: 800-497-6573 or 303-440-8517

IDEAS FOR LIVING, INC. BOULDER, COLORADO 80304
0-17, and teaching. For YCHC, preferences are: bilin-
gual in English/Spanish; 2 years or more general pediatrics experience; experience with public sector pro-
grams and underserved populations; experience with
ethnic or language minorities; knowledge of develop-
ment disabilities in minority populations; experience
with school-based health programs; and experience
in management and with multi-agency collaboration.
Positions will remain open until filled. Pool will be active
until May 29, 1998. Applications will be accepted
throughout this period. For complete information, inter-
ested individuals should obtain a vacancy announcement,
and direct inquiries and/or CV with sig-
nature and at least 3 letters of support to Carla Skok,
Administrator, Department of Pediatrics, University
of New Mexico, School of Medicine, ACC-3rd Floor,
Albuquerque, NM 87131-5311. Phone (505)

CLASSIFIED ADVERTISING POLICY

When you need to contact pediatricians, contact AAP News. Each month more than 53,000 pediatricians,
pediatric specialists, third-year pediatric residents and other subscribers turn to AAP News for child health
information they cannot get elsewhere. With a classified ad, you can speak directly to those readers.

Although the Academy believes these classified ads are from reputable sources, the Academy does not investigate
the offers made and assumes no responsibility concerning them.

Occasionally, it is necessary to modify the wording of classi-
ﬁed ads. These changes are generally made in compliance
with the regulations of various federal and state com-
missions against discrimination or because they might be
interpreted as being unlawful or in conﬂict with accepted
professional standards of medical practice.

These advertising modiﬁcations are made to maintain a class-
siﬁed section that is professionally responsible, lawful,
scientiﬁc and free of discrimination.

Practices for Sale
California
A well established, solo pediatric practice in the San Francisco area — Respond to AAP News, Box 01228, 141 Northwest Point Blvd., Elk Grove Village, IL 60007.

Connecticut
Pediatric practice for sale — Beautiful Coastal Connecticut town, 45 miles north of New York. Established for 11 years. No managed care. Very lucrative. Solo pediatrician with every third or fourth night coverage. Hospital with pediatric PA and NURsU. Over 800 families on waiting list. Closed to new patients for 5 years. Could easily use two pediatricians. Please reply to Glenn Feole, M.D., Box 749, Westport, CT 06880; e-mail: glenn.l.foole@SNET.net.
ZITHROMAX® (azithromycin or oral suspension)

BRIEF SUMMARY

ZITHROMAX® (azithromycin) is indicated for the treatment of patients with moderate to severe infections (see WARNINGS) caused by susceptible strains of the following: patients with cystic fibrosis, patients with nosocomially acquired infections, patients with severe infections, and patients with cystic fibrosis, patients with severe infections, and patients with severe infections.

INDICATIONS AND USAGE

ZITHROMAX® (azithromycin) is indicated for the treatment of patients with moderate to severe infections (see WARNINGS) caused by susceptible strains of the following: patients with cystic fibrosis, patients with nosocomially acquired infections, patients with severe infections, and patients with cystic fibrosis, patients with severe infections, and patients with severe infections.

DOSE AND ADMINISTRATION: Specific dosage recommendations are based on the severity of the infection and the patient's response to therapy. The usual dosage for treatment of postoperative pulmonary infections is 5 mg/kg/day given in a single dose. The maximum daily dosage is 300 mg when administered to patients weighing less than 150 kg. If a higher dosage is required, it should be given in divided doses according to the patient's response to therapy.

INFORMATION FOR PATIENTS: Patients should be informed that theophylline levels may increase following therapy with ZITHROMAX®, due to increased hepatic metabolism of theophylline. Patients should be advised to monitor their theophylline levels during therapy and to notify their healthcare provider if symptoms of theophylline toxicity occur.

SIDE EFFECTS:

No significant adverse effects have been reported. The frequency and severity of adverse effects were similar to those reported with other azithromycins.

The most common adverse events reported in patients treated with ZITHROMAX® were: headache, diarrhea, flatulence, nausea, vomiting, abdominal pain, and rash. Other adverse events reported in patients treated with ZITHROMAX® were: abdominal pain, diarrhea, flatulence, nausea, vomiting, abdominal pain, and rash.

The incidence of adverse events reported in patients treated with ZITHROMAX® was similar to that reported with other azithromycins. The most common adverse events reported in patients treated with ZITHROMAX® were: headache, diarrhea, flatulence, nausea, vomiting, abdominal pain, and rash.

ACUTE ORAL MEDICINE: ZITHROMAX® (azithromycin) is indicated for the treatment of patients with severe infections, and patients with cystic fibrosis, patients with severe infections, and patients with severe infections. The usual dosage for treatment of postoperative pulmonary infections is 5 mg/kg/day given in a single dose. The maximum daily dosage is 300 mg when administered to patients weighing less than 150 kg. If a higher dosage is required, it should be given in divided doses according to the patient's response to therapy.

STABILITY: ZITHROMAX® (azithromycin) is stable under normal storage conditions. The drug should be stored at room temperature and protected from light.

Product: ZITHROMAX® (azithromycin) is available in tablets, oral suspension, and intravenous injection. The oral suspension is available in a concentration of 6 mg/mL. The intravenous injection is available in a concentration of 6 mg/mL. The tablets are available in two strengths: 250 mg and 500 mg. The oral suspension is available in two strengths: 3 mg/mL and 5 mg/mL. The intravenous injection is available in a concentration of 6 mg/mL. The tablets are available in two strengths: 250 mg and 500 mg. The oral suspension is available in two strengths: 3 mg/mL and 5 mg/mL. The intravenous injection is available in a concentration of 6 mg/mL.

The tablets should be stored at room temperature and protected from light.

The oral suspension should be stored at room temperature and protected from light.

The intravenous injection should be stored at room temperature and protected from light.

REFERENCES:

The antibiotic solution with predictable results in unpredictable patients

Predictable Coverage of Key Pathogens:
H influenzae, S pneumoniae, and M catarrhalis

Predictable Results:
Proven as effective as Augmentin

Predictable Convenience:
The only 5-day, once-daily treatment

Predictably Well Tolerated:
Only 0.3% discontinuation due to side effects

The most frequent side effects are diarrhea/loose stools (2%), abdominal pain (2%), vomiting (1%), and nausea (1%). Zithromax (azithromycin) is contraindicated in patients with known hypersensitivity to azithromycin, erythromycin, or any macrolide antibiotic.
