New Applicants

Dear Academy Fellow,

In order to fulfill the admission requirements of AAP BYlaws, you are requested to:

1. Carefully review the following list of new applicants for Academic membership, and relay your reactions directly to your District Chairperson, whose name and address is at the end of this list.

In submitting these names of board-certified pediatricians to you, it is understood that academic and pediatric credentials are not in question. Comments are requested concerning possible legal and/or ethical situations of which you might have personal knowledge.

Send any comments on the following new applicants to your District Chairperson by September 15.

CLASSIFIED ADVERTISING POLICY
When you need to contact pediatricians, contact AAP News. Each month more than 53,000 pediatricians, pediatric specialists, third-year pediatric residents and other subscribers turn to AAP News for child health information they cannot get elsewhere. With a classified ad, you can speak directly to those readers.

Although the Academy believes these classified ads are from reputable sources, the Academy does not investigate the offers made and assumes no responsibility concerning them.

Occasionally, it is necessary to modify the wording of classified ads. These changes are generally made in compliance with the regulations of various federal and/or state commissions against discrimination or because they might be interpreted as being unlawful or in conflict with accepted professional standards of medical practice.

These advertising modifications are made to maintain a classified section that is professionally responsible, lawful, scientific and free of discrimination.

“T’d thought nothing could wake our six year old son. But when a urologist recommended the Potty Pager, we decided to give it a try. Three weeks later our son’s bedwetting problems were over!”

Jan Van Hoff

Bedwetting! Why just “control” it when YOU CAN CURE IT! With the WIRELESS alarm than alerts THE BEDWETTER... not the whole house!

The Potty Pager teaches bedwetters to respond normally to bladder fullness. It uses a tactile alarm, much like a silent business pager. It is 100% safe, runs on two “AA” batteries, and costs just $49.95 + S&H. It comes with a 30 day no-questions guarantee. We’re sure that it’ll work!

Guidelines for Adolescent Preventive Services (GAPS)*

*GAPS® is a comprehensive set of recommendations that provides a framework for the organization and content of preventive health services for adolescents.

- **GAPS includes 24 comprehensive recommendations for primary care providers**
- **GAPS improves the delivery of adolescent clinical preventive services**
- **GAPS addresses leading morbidities of adolescents ages 11-21**

To learn more about how you can improve the quality of care for the adolescents in your practice and help train your colleagues, come to the GAPS Training-of-Trainers program.

**Training Dates**
November 6, 7, & 8

The AMA is accredited by the Accreditation Council for Continuing Medical Education to sponsor continuing medical education for physicians. The AMA designates this continuing medical education activity for up to 10 credit hours of Category 1 of the Physician’s Recognition Award.

**Training Goal**
Participants of the American Medical Association GAPS Training-of-Trainers program will become expert teachers/facilitators of comprehensive clinical preventive services.

**Training Objectives**
Participants will be able to
- explain the role and responsibilities of trainers
- explain the justification and rationale for the 24 GAPS recommendations
- identify ways to incorporate preventive service recommendations into health services
- demonstrate principles of adult learning
- present a one-day GAPS implementation training

For more information, call the Department of Adolescent Health at the American Medical Association, 312-464-5570, or e-mail: Mary.Kizer@ama-assn.org

Registration deadline is September 22.

The antibiotic solution with predictable results in unpredictable patients

**Predictable Coverage of Key Pathogens:**
*H influenzae, S pneumoniae, and M catarrhalis*

**Predictable Results:**
Proven as effective as Augmentin

**Predictable Convenience:**
The only 5-day, once-daily treatment

**Predictably Well Tolerated:**
Only 0.3% discontinuation due to side effects

The most frequent side effects are diarrhea/loose stools (2%), abdominal pain (2%), vomiting (1%), and nausea (1%). Zithromax (azithromycin) is contraindicated in patients with known hypersensitivity to azithromycin, erythromycin, or any macrolide antibiotic.

Zithromax (azithromycin for oral suspension)

*Zithromax* (azithromycin) is indicated for community-acquired pneumonia (CAP) due to Chlamydia pneumoniae, Haemophilus influenzae, Mycoplasma pneumoniae, or Streptococcus pneumoniae in patients appropriate for oral therapy.

*Azithromycin should not be used in pediatric patients with pneumonia who are judged to be inappropriate for oral therapy because of moderate to severe illness or risk factors such as any of the following: patients with cystic fibrosis, patients with nosocomially acquired infections, patients with known or suspected bacteremia, patients requiring hospitalization, or patients with significant underlying health problems that may compromise their ability to respond to their illness (including immunodeficiency or functional asplenia).

† Due to *H influenzae*, *S pneumoniae*, or *Moraxella catarrhalis*.

‡ Randomized, double-blind, double-dummy multicenter study in which 553 children with acute otitis media received powder for oral suspension forms of Zithromax (10 mg/kg on day 1, 5 mg/kg qd on days 2-5) or Augmentin (40 mg/kg/day in three divided doses for 10 days) and were evaluated for clinical efficacy and safety.
