Quality Medical Equipment

Goodtime Medical offers a variety of pediatric and general treatment tables to meet your needs and put your patients at ease. All tables are shipped fully assembled and are available in 14 different colors.

Modular Casework
Match your exam tables perfectly with high quality medical casework. Full extension drawers and 5/4 inch thick doors are superior to thin metal cabinets. Casework is easy to install and available in many stores.

Whale
Make a splash with the Whale as your patients climb up the tail. Recessed non-slip steps will ease your back and time because your patients board the whale by themselves. There is plenty of storage in the belly of this friendly creature with foldable storage cabinets. A footrest for taller patients is located in the tail. If 36” W x 50” L. Options: Lift pull step

Youth Bed
The giraffe, monkey, and hippo are guaranteed to put a smile on your little patients’ faces while providing all the essential needs for their care and comfort. Side rails are adjustable for easy access to patient. Headboard can be removed if necessary and is available in many stores. If 64” W x 45” L. 39”

Welcome your patients with reception room furniture that will comfort and entertain them while they wait. You can choose from a variety of colors and textures to customize your reception area. Our CID professionals can design our furniture to fit your space.
A very common, highly contagious and potentially serious virus

Each year, more than 125,000 babies are hospitalized with RSV (respiratory syncytial virus) disease. Sadly, some of these babies will die.

RSV is a virus that infects almost all children before the age of two. Most get cold-like symptoms and fight off the virus easily. Some infants, especially premature infants, become seriously ill because their lungs aren’t fully developed and their bodies can’t fight infection as well.

You should be especially aware of RSV if your baby:

- Was born prematurely (more than four weeks early)
- Has lung disease
- Has heart disease
- Goes to child care or day care
- Has school-age brothers or sisters at home
- Is exposed to tobacco smoke

You can help prevent RSV disease in your infant

Serious RSV disease is preventable. As the parent of a premature infant, you can help to protect your baby from being hospitalized due to RSV disease.

- Keep sick children and adults away from your baby during the RSV season (Fall through Spring in most areas of the U.S.).
- Don’t allow smoking in your home or near your baby.
- Always wash your hands with soap and warm water before touching your baby.
- If your infant was born prematurely, ask your health care provider about a medication that helps prevent RSV disease.

For more information, please call the RSV hotline at 1-877-848-8510 or visit our website:

MedImmune, Inc.
Gaithersburg, MD 20878
Premature babies need extra care in the hospital and when they go home...especially in the "Cold and Flu" season.

Thousands are hospitalized every year.

Help protect your preemie from serious RSV disease.

Preemies, up to age two, are at high risk from a potentially serious virus called RSV.

It can be prevented.

Ritalin® LA—an optimized way to improve the school day

Data vs Concerta® (methylphenidate HCl) extended-release tablets
confirmed in 2 clinical trials

- Superior improvement in attention vs Concerta® 36 mg over the first 4 hours
- Greater improvement in math test scores*

Ask your Novartis sales representative for more information.

Ritalin® LA should be given cautiously to patients with a history of drug dependence or alcoholism. Chronic abusive use can lead to marked tolerance and psychological dependence. Frank psychotic episodes can occur, especially with parenteral abuse. (See Boxed Warning.)

Data are from 2 head-to-head, placebo-controlled, crossover, analog-classroom studies of 36 and 54 patients.
*Ritalin® LA 20 mg demonstrated numerically greater scores than Concerta® 36 mg (P=NS).

Ritalin® LA is indicated for the treatment of Attention Deficit Hyperactivity Disorder (ADHD).

Please see brief summary of full prescribing information, including Contraindications and Boxed Warning, provided on the following page.
