NEW FELLOWS

Dear Academy Fellow:
In order to fulfill the admission requirements of AAP Bylaws, you are requested to:
Carefully review the following list of new Fellows for Academy membership; and relay your reactions directly to your District Chairperson, whose name and address is at the end of this
list. In submitting these names of board-certified pediatricians to you, it is understood that academic and pediatric credentials are not in question. Comments are requested concerning possible legal and/or ethical situations which you might have personal knowledge.
Send any comments on the following list of new Fellows to your District Chairperson.

Connecticut
Carla Jacobson-Kiel, M.D., FAAP
Hartford, CT 06105

Massachusetts
Jeffrey Burns, M.D., M.P.H., FAAP
Boston, MA 02119
Jeannein Mogavero, M.D., FAAP

Pediatricians
Elevate Your Career in Santa Fe

Santa Fe is one of the most widely known cities in the world. “The City Different” is 7,000 feet above sea level with nearby peaks as high as 14,000 feet, and has a rich tradition as a culturally diverse, national art center and offers a full range of outdoor recreational activities.

St. Vincent Hospital is a non-profit, 268-bed, Level III Trauma Center, accredited by JCAHO. Our pediatrics clinic has an opportunity for a BC/BE pediatrician to join a six pediatrician/4NP/PA group as soon as possible. Inpatient and outpatient responsibility and very reasonable call schedule. Competitive salary and excellent benefits.

For information or to apply, please contact:
Crystal von Whipperman,
Director, Physician Recruitment & Relations,
800/620-5779 or 505/630-3170. Fax 505/995-4920
e-mail crystalvonwhipperman@stvin.org

No fee or visa sponsorships.
St. Vincent Hospital • 455 St. Michael’s Drive, Santa Fe, NM 87505
Finally, a non-irritating approach to dry skin care...

VANICREAM
Skin Care Cream

Specially formulated to avoid common chemical irritants found in ordinary moisturizers. No dyes, perfume, fragrance or masking fragrance, parabens, lanolin, or formaldehyde.

Vanicream Skin Care Cream...
- soothes red, irritated, cracking or itchy skin
- non-greasy
- easy-to-spread
- quickly absorbed
- long-lasting
- safe - apply as needed
- non-prescription (OTC)
  - for normal and sensitive skin
  - non-comedogenic

Effective in the treatment of atopic dermatitis, eczema, psoriasis, and ichthyosis which may be aggravated by lack of moisture.

Skin care products you can recommend with confidence.

Ideal for even the most sensitive, delicate skin.

Recommended by dermatologists for over 20 years.

For more information or free samples, call toll free 1-800-325-8232 or visit our website at www псico.com

The 24th ANNUAL NATIONAL PEDIATRIC INFECTIOUS DISEASE SEMINAR, April 14-17, 2004, Hyatt Regency Chicago on the Riverwalk, Chicago IL. The University of Texas Southwestern Medical Center at Dallas, the accredited sponsor, is jointly sponsoring this activity with the National Pediatric Infectious Diseases Foundation. CME/AAP credits offered. For further information or to register for the meeting you may consult the Web site: www.npids.org or call (972) 541-0973.

“My pediatrician friends told me alarms are useless. Now (thanks to the Potty Pager) I know they were wrong.”

Eugene Leiken, MD, Israel

“Our success rate with the Potty Pager is 75 to 80 percent.”

Rudolph Valentini, MD, pediatric nephrology, Children’s Hospital, Detroit

“Our six-year-old daughter was soaking the bed nightly. The third week on the Potty Pager it was like ‘poof’ – she was dry.”

The Noyes Family

“My ‘comatose’ nine-year-old had never had a dry night. In just six weeks (with the Potty Pager) he started sleeping dry through the night. Frankly, this is pretty miraculous.”

Sunny Rigby

“My six-year-old had never had a dry night. Within two weeks, he was sleeping dry through the night. I had no idea how successful this would be.”

Elaine Fournier

The Potty Pager teaches bedwetters to respond normally to bladder fullness. It uses a tactile alarm, much like a silent business pager. It is 100% safe, and costs just $56.00 + S&H. It comes with a 30 day no-questions guarantee.

For complete information call: 800-497-6573 or 303-440-8517

CHILDHOOD ASTHMA AND ALLERGIES: IMPROVING EVIDENCE-BASED TREATMENT AND THE ROLE OF INHALED CORTICOSTEROIDS

HOME STUDY AND ONLINE MATERIALS NOW AVAILABLE AT WWW.PEDASTHMA-CME.COM

- Print Monograph and Post Test
- Audio-based Program with Accompanying Booklet and Post Test
- Internet-based Program and Post Test

ACTIVITY PURPOSE
This activity is intended to update practicing pediatricians, primary care physicians, and other health care practitioners on the growing burden of childhood asthma and allergic rhinitis and provide current evidence on the appropriate diagnosis and treatment of these potentially coexisting conditions.

STATEMENT OF NEED
Asthma is the leading serious chronic childhood illness, affecting ~6.3 million children younger than 18 years. In 2001, 4.2 million children had an asthma episode. These asthma attacks substantially impact children, families, and the health care system. Children miss 14 million days of school annually because of asthma. For children younger than 15 years, asthma is the third leading cause of hospitalization. Although only 22% of the US population is younger than 15 years, >43% of hospital discharges for asthma occurred in this age group.

Children with asthma also may have concomitant allergic rhinitis. There is increasing knowledge of the interrelationship among allergic airways diseases, and evidence suggests that asthma and allergic rhinitis are linked epidemiologically and pathophysiology, supporting the concept of “one airway, one disease.” Importantly, symptoms of allergic rhinitis have been reported to occur in as many as 86% of patients with asthma, while asthma affects up to 43% of patients with allergic rhinitis. The Centers for Disease Control reports that allergic rhinitis and asthma each account for ~9 million annual visits to office-based physicians. Finally, seasonal allergic rhinitis affects 10–25% of the population and is more common among children and adolescents than adults.

Despite the dissemination of asthma (NAEPP) and allergic rhinitis (ARIA) guidelines that recommend inhaled and nasal corticosteroids as preferred therapy, appropriate use of these medications by pediatricians and primary care physicians continues to be an important clinical goal.

LEARNING OBJECTIVES
After this activity, participants should be able to improve health outcomes for children with asthma and allergic rhinitis by:
1. Identifying the interrelationship between asthma and allergic disorders
2. Recognizing the importance of early diagnosis
3. Applying new evidence supporting the efficacy and safety of nasal and inhaled corticosteroids

TARGET AUDIENCE
This educational activity is designed for pediatricians, physician assistants, nurses, nurse practitioners, family physicians, and other health care practitioners with an interest in pediatric allergic airways diseases.

ACCREDITATION STATEMENT
National Jewish Medical and Research Center is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

This activity has been jointly planned and implemented in accordance with the Essential Areas and Policies of the Accreditation Council for Continuing Medical Education (ACCMCE) through the joint sponsorship of National Jewish Medical and Research Center and Clarus Health, LLC.

FOR ADDITIONAL INFORMATION VISIT WWW.PEDASTHMA-CME.COM OR CALL 866-992-9940

Jointly sponsored by National Jewish Medical and Research Center and Clarus Health, LLC.

Supported by an educational grant from AstraZeneca LP.
