Make the AAP Your CME Destination in 2004!

The American Academy of Pediatrics is committed to providing you with top-quality continuing medical education, and in 2004, we've got something for everyone! Here's a look at what we have planned this year:

**SuperCME 2004**
*Practice, Patients, Problems: Solving the Pediatric Puzzle*
April 28-May 1 • Orlando, Florida

**Practical Pediatrics CME Courses**
May 13-15 • Santa Fe, New Mexico  
May 27-29 • Hilton Head Island, South Carolina  
June 25-27 • Washington, DC  
September 3-5 • Vancouver, British Columbia, Canada  
October 1-3 • Naples, Florida  
November 11-13 • San Juan, Puerto Rico  
December 17-19 • Williamsburg, Virginia

**PREP® The Course**
June 12-16 • Minneapolis, Minnesota  
September 11-15 • Costa Mesa, California

**2004 National Conference & Exhibition**
October 9-13 • San Francisco, California

**The Advanced Workshop: Coding, Documentation, and Reimbursement in Pediatric Practice**
May 1-2 • Orlando, Florida

**Getting Paid for What You Do: Coding and Management in Pediatric Practice**
December 15-16 • Williamsburg, Virginia

**Section/Subspecialty CME Activities:**
*Workshop on Perinatal Practice Strategies*
April 16-18 • Scottsdale, Arizona

**Pediatric and Adolescent Sports Medicine**
June 17-20 • Monterey, California

**PREP®: EM**
*An Intensive Review Course of Pediatric Emergency Medicine*
August 7-11 • Toronto, Ontario, Canada

**DB: PREP®**
*An Intensive Review of Developmental/Behavioral Pediatrics*
August 11-15 • Chicago, Illinois

For comprehensive information, to order a brochure, or to register online, visit us on the Web at www.pedialink.org/cmefinder.
If DHA and ARA are in breast milk, shouldn’t they be in infant formula too?

DHA and ARA are nutrients found in breast milk that are important to a baby’s brain and eye development. Martek has perfected a technique for producing these nutrients from a vegetable source. We are the first and only supplier of DHA and ARA for U.S. infant formula use, with our nutrients being found in most major U.S. formula brands. Breastfeeding is best, but if a mother is unable or chooses not to, then her formula should be as close as possible to breast milk.

*Ask your formula representatives about the DHA and ARA levels in their brands.*
ElixSure™. The first spill-resistant children’s medicine. Now you can be sure your patients get all the relief you recommend.

- Helps assure medication stays on the spoon...even when turned upside down.
- Available in single symptom formulas: acetaminophen, dextromethorphan HBr or pseudoephedrine HCl.
- Unique formulation doesn't require shaking, helping to assure every dose contains a full complement of active ingredient.
- Great-tasting flavors, including grape, cherry and bubble gum.
- Indicated for ages 2-12.

Be sure with ElixSure™

Put moderate to severe eczema in its place. Up to 4 years of research shows Protopic is safe and effective long-term intermittent treatment.1,2

Steroid-free Protopic is an effective treatment for your patients with moderate to severe eczema. It offers rapid improvement within 1 week and no loss of efficacy over time. And, unlike conventional therapies, Protopic use is not associated with skin atrophy, striae, hypopigmentation, or adrenal gland suppression.1,7

www.protopic.com
Please see brief summary of prescribing information following this advertisement.
©2004 Fujisawa Healthcare, Inc. PT2181 12/03

"Protopic is indicated for short-term and intermittent long-term therapy in patients with moderate to severe atopic dermatitis who should avoid the potential risks of conventional therapies or are not adequately responsive to conventional therapies. Both 0.03% and 0.1% ointment can be used for adults. In children aged 2 to 15 years, only Protopic Ointment 0.03% is indicated.

The most common adverse events with Protopic included the sensation of skin burning, pruritus, flu-like symptoms, and headache, and it is contraindicated in patients who are hypersensitive to tacrolimus or any of the other ingredients of Protopic. Protopic Ointment should not be used with occlusive dressings.

Skin infections should be cleared prior to application, and there may be an increased risk of certain skin infections. Patients should minimize or avoid natural or artificial sunlight exposure.

Put a lid on it, Eczema Beast.
Before you know it, the whole school could have pink eye.

That's why you need a treatment that works at the speed of VIGAMOX™

When you see a condition that moves as quickly as bacterial conjunctivitis, you need to tackle it fast. New data show that moxifloxacin (VIGAMOX™) eradicates *Staphylococcus aureus* 20X faster and *Staphylococcus epidermidis* 16X faster than ciprofloxacin (CILOXAN®). And VIGAMOX™ solution covers important pink-eye-causing bacteria that CILOXAN® solution doesn't, with conjunctival concentrations 2X higher.²⁻⁴

That's treatment at the speed of VIGAMOX™—hook, line, and sinker.

VIGAMOX™ solution is indicated for the treatment of bacterial conjunctivitis. VIGAMOX™ solution is contraindicated in patients with a history of hypersensitivity to moxifloxacin, to other fluoroquinolones, or to any of the components in this medication. *In vitro* data are not always indicative of clinical success or microbiological eradication in a clinical setting. The dosing of VIGAMOX™ solution is one drop in the affected eye(s) 3 times daily for 7 days.

Please see brief summary of prescribing information on adjacent page.

NEW FELLOWS

Dear Academy Fellow:
In order to review the admission requirements of AAP Bylaws, you are requested to:
Carefully review the following list of new Fellows for Academy membership; and relay your reactions directly to your District Chairperson, whose name and address is at the end of this list. In submitting these names of board-certified pediatricians to you, it is understood that academic and pediatric credentials are not in question. Comments are requested concerning possible legal and/or ethical situations which you might have personal knowledge.
Send any comments on the following list of new Fellows to your District Chairperson.

Geoffrey Bird, M.D., FAAP

American Academy
of Pediatrics
DEDICATED TO THE HEALTH OF ALL CHILDREN™

“My pediatrician friends told me alarms are useless. Now (thanks to the Potty Pager) I know they were wrong.”

Eugene Leiken, MD, Israel

“Our success rate with the Potty Pager is 75 to 80 percent.”

Rudolph Valentini, MD, pediatric nephrology, Children’s Hospital, Detroit

“Our six-year-old daughter was soaking the bed nightly. The third week on the Potty Pager it was like ‘poof’ – she was dry.”

The Noyes Family

“My ‘comatose’ nine-year-old had never had a dry night. In just six weeks (with the Potty Pager) he started sleeping dry through the night. Frankly, this is pretty miraculous.”

Sunny Rigby

“My six-year-old had never had a dry night. Within two weeks, he was sleeping dry through the night. I had no idea how successful this would be.”

Elaine Fournier

The Potty Pager teaches bedwetters to respond normally to bladder fullness. It uses a tactile alarm, much like a silent business pager. It is 100% safe, and costs just $56.00 + S&H. It comes with a 30 day no-questions guarantee.

For complete information call: 800-497-6573 or 303-440-8517

Or visit our web site: www.pottypager.com
