2004 Educational Highlights
Keynote address by Former First Lady Rosalynn Carter
A Full Track on Managing and Combating Obesity
Plus sessions on:
- Current Strategies for Antibiotic Selection
- Top 20 Practice Management Tips
- The New Molecular Genetics in Clinical Practice: The Future is Now
- Asthma Therapy: New and Coming
- Depression and its Treatment in Primary Care Pediatrics
- The Newest Drugs of Abuse: Know as Much as Your Patients

Skip the Long Lines
Changes in registration procedures were introduced last year to minimize lines and waiting time. Look inside for more details.

Don’t Miss Out
- Network with your colleagues
- Honor the many contributions of retiring AAP Executive Director Joe M. Sander Jr., M.D., FAAP
- Be there to kick-off AAP’s 75 Years of Caring celebration
- Update your clinical skills and techniques
- Hear the latest from world-renowned pediatric experts
- Attend cutting-edge courses, workshops and case discussions
- Earn up to 52 valuable AMA PRA Category 1 credits

Experience America’s Favorite City!
Combine CME with R&R in San Francisco. Hop on a cable car, catch a ferry or walk its famous hills. Along the way, stop at Union Square for world-class shopping, Chinatown for an exotic taste of a different culture, and North Beach for boutiques, restaurants and nightlife. Visit Pacific Heights, featuring the best of the city’s elegant Victorian past, or Haight-Ashbury for a colorful trip back to the ’60s. At land’s end, you’ll find Ghiradelli Square and its world-famous chocolate; Fisherman’s Wharf with its fresh steamed crab; and Pier 39 with its sun-bathing harbor seals. In San Francisco Bay, Alcatraz offers a glimpse into a legendary past, while the spectacular Golden Gate Bridge, Sausalito, Muir Woods, and the beauty of the wine country all promise to leave you and your family with great memories for the future. So make your plans now to experience the 2004 NCE.
DHA and ARA are nutrients found in breast milk that are important to a baby’s brain and eye development. Martek has perfected a technique for producing these nutrients from all natural vegetable sources. Over the past 10 years, infant formula companies have been supplementing formulas with Martek’s DHA and ARA, touching the lives of more than 5 million babies worldwide. Currently, most major U.S. formula brands contain these important nutrients produced by Martek.

If you have questions about Martek’s DHA and ARA call 1-888-652-7246 or visit martekbio.com.

Breastfeeding is best, but if a mother is unable to breastfeed or chooses not to, then her formula should be as close as possible to breast milk.

Martek®

We’re putting more thought into formula.

Finally, a non-irritating approach to dry skin care...

VANICREAM™
Skin Care Cream

Specially formulated to avoid common chemical irritants found in ordinary moisturizers. No dyes, perfume, fragrance or masking fragrance, parabens, lanolin, or formaldehyde.

Vanicream Skin Care Cream...
- soothes red, irritated, cracking or itchy skin
- non-greasy
- easy-to-spread
- quickly absorbed
- long-lasting
- safe - apply as needed
- non-prescription (OTC)
  - for normal and sensitive skin
  - non-comedogenic

Effective in the treatment of atopic dermatitis, eczema, psoriasis, and ichthyosis which may be aggravated by lack of moisture.

Skin care products you can recommend with confidence.

Ideal for even the most sensitive, delicate skin.

Recommended by dermatologists for over 20 years.

For more information or free samples, call toll free 1-800-325-8232 or visit our website at www.psico.com

PHARMACEUTICAL SPECIALTIES, INC.
ROCHESTER, MN 55903-6298
Put moderate to severe eczema in its place. Up to 4 years of research shows Protopic is safe and effective long-term intermittent treatment.*12

Steroid-free Protopic is an effective treatment for your patients with moderate to severe eczema. It offers rapid improvement within 1 week and no loss of efficacy over time. And, unlike conventional therapies, Protopic use is not associated with skin atrophy, striae, hypopigmentation, or adrenal gland suppression.17

Put a lid on it, Eczema Beast.

Please see brief summary of prescribing information following this advertisement.
©2004 Fujisawa Healthcare, Inc. PT2181 12/03

"Protopic is indicated for short-term and intermittent long-term therapy in patients with moderate to severe atopic dermatitis who should avoid the potential risks of conventional therapies or are not adequately responsive to conventional therapies. Both 0.03% and 0.1% ointment can be used for adults. In children aged 2 to 15 years, only Protopic Ointment 0.03% is indicated.

The most common adverse events with Protopic included the sensation of skin burning, pruritus, flu-like symptoms, and headache, and it is contraindicated in patients who are hypersensitive to tacrolimus or any of the other ingredients of Protopic.

Protopic Ointment should not be used with occlusive dressings.

Skin infections should be cleared prior to application, and there may be an increased risk of certain skin infections. Patients should minimize or avoid natural or artificial sunlight exposure.

Enfamil® Nutramigen® LIPIL®

Trusted Leader for Allergy Symptom Risk Reduction & Relief

Significantly reduces allergy symptom development by over 40%

In a recent study, only Nutramigen significantly reduced the risk of development of allergy symptoms in babies with a family history of allergy.¹

Quickly resolves allergy symptoms* when they occur

• No formula clinically proven to resolve colic symptoms* faster—often within 48 hours²,³
• Resolves GI-related symptoms⁴

*Due to cow's milk protein allergy

Before you know it, the whole school could have pink eye.

That's why you need a treatment that works at the speed of VIGAMOX™.

When you see a condition that moves as quickly as bacterial conjunctivitis, you need to tackle it fast. New data show that moxifloxacin (VIGAMOX™) eradicates Staphylococcus aureus 20X faster and Staphylococcus epidermidis 16X faster than ciprofloxacin (CILOXAN®). And VIGAMOX™ solution covers important pink-eye-causing bacteria that CILOXAN® solution doesn’t, with conjunctival concentrations 2X higher.2-4

That's treatment at the speed of VIGAMOX™—hook, line, and sinker.

VIGAMOX™ solution is indicated for the treatment of bacterial conjunctivitis. VIGAMOX™ solution is contraindicated in patients with a history of hypersensitivity to moxifloxacin, to other fluoroquinolones, or to any of the components in this medication. In vitro data are not always indicative of clinical success or microbiological eradication in a clinical setting. The dosing of VIGAMOX™ solution is one drop in the affected eye(s) 3 times daily for 7 days.

Please see brief summary of prescribing information on adjacent page.

Get your office running at the speed of information.

Today Aetna is using information to make things faster and easier, from the moment a patient enters your office to the time the visit is paid for. With Aetna’s electronic practice tools for health care professionals, you can quickly verify current patient eligibility, submit and verify referrals and pre-certifications, file claims, check claim status, and receive payment—all electronically. To find out how we put information to work to make your work easier, visit us today at aetna.com.
Dear Academy Fellow:

In order to fulfill the admission requirements of AAP Bylaws, you are requested to:

Carefully review the following list of new Fellows for Academy membership; and relay your reactions directly to your District Chairperson, whose name and address is at the end of this list. In submitting these names of board-certified pediatricians to you, it is understood that academic and pediatric credentials are not in question. Comments are requested concerning possible legal and/or ethical situations which you might have personal knowledge.

Send any comments on the following list of new Fellows to your District Chairperson.
