ATTENTION DISORDERS

with or without Hyperactivity

developed by Rose Ullmann, M.Ed., Esther Sisler, M.D., Robert Sprague, Ph.D.

Accurate diagnosis of ADHD is often difficult because more than 80% of ADHD children behave well in the doctor's office. For this reason, physicians rely heavily on feedback from classroom teachers in diagnosing, medicating, and monitoring children with attention disorders.

ACTeS is a standardized teacher rating form for grades K-8 that objectively measures four separate characteristics: Attention, Hyperactivity, Social Skills, and Oppositional Behavior. The reliability, validity, and utility of ACTeS have been repeatedly demonstrated in published studies and clinical trials through its 20-year research history. Teachers respond to the 24 items that describe classroom behavior. These ratings are summed and transferred to the Profile Form where norm comparisons are read directly.

- Examiner's Kit (Manual and Rating/Profile Form) $50.00 plus $5.00 s/h

Swim Lessons
for Kids

This international award-winning 40-minute video and accompanying 30-page booklet directs parents and caregivers in teaching children ages 3 to 12 how to float, swim the crawl stroke, breathe while swimming, swim the back stroke, and master survival skills. Swim Lessons for Kids creates a positive learning experience and teaches the concept of water safety to children. ($29.95)

To order, call the AAP Publications Department at 800/433-9016. For more information on other AAP-endorsed/approved programs, call the Division of Public Education at 800/433-9016, ext. 4315.
NOW, KIDS CAN GROW UP WITH DIMETAPP®

New Dimetapp® Chewable Tablets

Unsurpassed efficacy and a great grape taste.

Dimetapp stands for a heritage of efficacy and good taste. And, now, that heritage continues in a new form. New Dimetapp Chewable Tablets contain the same ingredients as Dimetapp Elixir to provide unsurpassed cold and allergy relief in a grape-tasting tablet. Each Dimetapp Chewable Tablet contains 1 mg of brompheniramine and 6.25 mg of phenylpropanolamine. And Dimetapp Chewable Tablets were taste tested by children and significantly preferred over grape-tasting Children’s Tylenol® Cold Chewable Tablets.1

Dimetapp® Elixir: Effective cold relief and a heritage of compliance.

Dimetapp Elixir combines one of the most effective non-prescription antihistamines2 with an effective nasal decongestant for cold relief you can trust. Dimetapp relieves sniffing and sneezing while it eases nasal congestion and helps restore freer breathing.

Dimetapp® DM: Cold relief plus cough suppression in a red grape taste.

Dimetapp DM relieves cold symptoms and quiets coughs, too. It contains dextromethorphan, the most recommended non-narcotic cough suppressant.

Recommend Dimetapp for efficacy, trust and compliance in a single word.

TRUST DIMETAPP®

The most recommended antihistamine/decongestant formula for children’s cold and allergy relief.
