Contributors' Statement Page

[Each author should only appear once. Use names, not initials. If multiple authors have identical contributions, list them in the same sentence; otherwise, list separately.]

Dr Smith and Prof Jones conceptualized and designed the study, drafted the initial manuscript, and reviewed and revised the manuscript.

Drs Noble, Eccleston, and Piper and Ms Johnson designed the data collection instruments, collected data, carried out the initial analyses, and reviewed and revised the manuscript.

Dr Green conceptualized and designed the study, coordinated and supervised data collection, and critically reviewed the manuscript for important intellectual content.

All authors approved the final manuscript as submitted and agree to be accountable for all aspects of the work.

Abstract [250 words max]

Objective

A 1- to 2-paragraph introduction outlining the wider context that generated the study and the hypothesis.

Methods

A “Patients and Methods” or a “Methods” section detailing inclusion criteria and study design to ensure reproducibility of the research.

Results

This section should give specific answers to the aims or questions stated in the introduction. The order of presentation of results should parallel the order of the methods section.

Conclusion

A brief concluding paragraph presenting the implications of the study results and possible new research directions on the subject.
